Welcome to our company

Smart Project & Electromechanically Trading W.L.L

is a leading enterprise in Qatar established in 2021 in the city of Doha as a trading & contracting company in consumer mechanical & electronics is today a fast growing and dynamic company that maintains a special technology focus and commitment to its customers in Qatar. We work closely with customers to develop new business opportunities- project coordination, sourcing of raw materials, investment and Development of sales channels are

typical of the ways.

Our strength lies in the technical competence, professional experts and experience of our people and associates. With the efforts of maximum sales, we have overcome our targets, though individual, corporations and oil sectors. We will continue to become the number one supplier in consumer and commercial electronics in the office, home and move

Vision

Our mission is to establish long-term, mutually rewarding relationships with each of our valued clients by consistently surpassing their expectations and gaining their trust through exemplary and dedicated performance by every member of the Smart Project Team.

Mission

To be the most professional and respected commercial electrical contractor/ electrical service provider. We understand that our clients appreciate the focus on preventative & proactive maintenance and the resulting peace of mind that comes from working with us.

What We Do..

4-1- Electrical Installation, Commissioning and testing:

We offer service you can count on, whether the job is large or small. We operate a team of highly qualified, professional electricians with experience of working on projects of all sizes, for both domestic and commercial clients. Our team gives us the capacity to take on a wide range of projects of all sizes, and offer our customers an impressive turnaround time on all projects.

We aim to go beyond the call of duty, building strong and long-lasting relationships with our clients. Our friendly, hands-on approach allows each electrical job to be tailored to the individual needs of our clients.

4-2- HVAC:

We provide a high level of service to all our clients and this is underpinned by the number of buildings where we have ongoing relationships for

required.

service, installation, upgrade and design of mechanical, electrical and our routine testing and maintenance procedures are supported by an effective afterhours emergency service wherever

We encourage you to experience the HVAC difference for yourself and look forward to assisting with all your HVAC needs.

4-3 – Switchgear and Control panel:

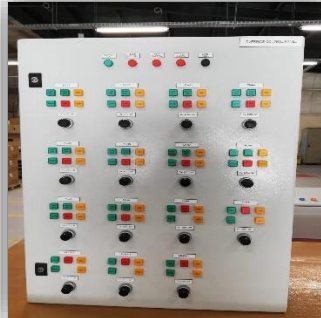

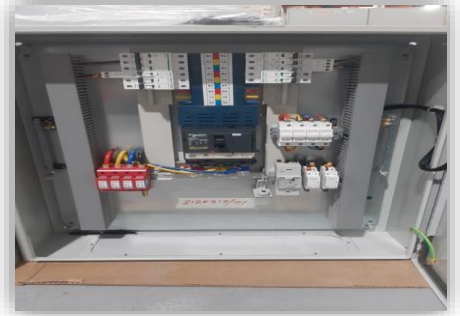

4-3-1 - Low Voltage Panel (LV, MSB, SMDB, DB, ATS, and MTS):

We develop and manufacture innovative systems for distribution of electricity based on the need and feedback of our customers taking into consideration the challenges of the constantly changing operating environment. We specialize in low voltage switchgear, substations and related services.

4-3-2 – Control Panel (MCC, VFD, and SOFTSTARTER):

We are a prominent trader and supplier of a comprehensive range of electrical control panels. Under this range, we offer VFD panel, isolator, panels, excitation panels, HT breaker panel, relay panels and PCC panels to name a few. All our products are manufactured using premium quality raw material and advent tools & technologies at our vendor's well equipped manufacturing unit.

4-3-3 – Home automation (KNX Systems):

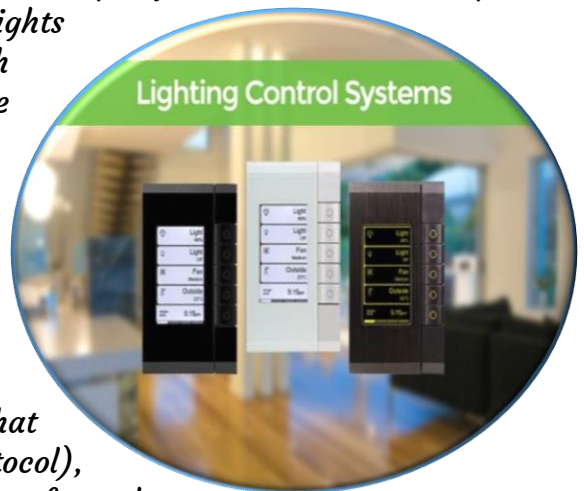

We are committed to providing automation for your home or business that is user-friendly and best fits your personal taste and priorities. We strive to understand and meet your needs using high-quality, high-value products, with solutions that exceed your expectations.

4-3-4 – Light Control Systems (Dali, Actuator):

Smart MEP is a smart homes company that develops hubs that allow the user to control and manage connected devices. The devices developed by the company can replace the light switches and allow the user to control the lights

using touch and voice commands. The device has a touch-enabled screen that shows all the connected devices (that use WiFi protocol),

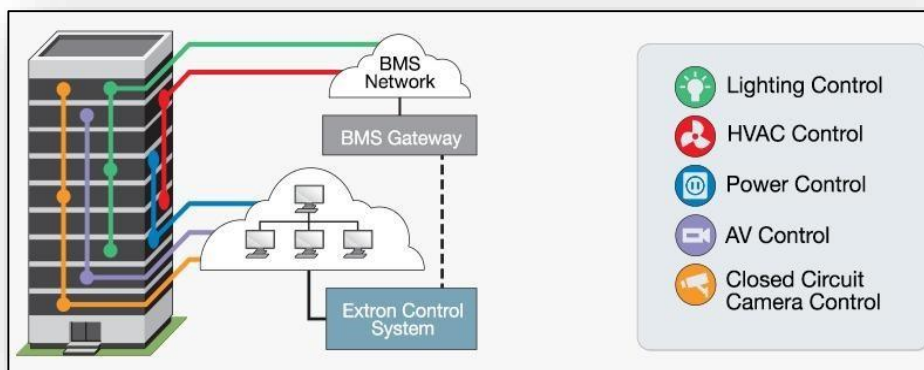

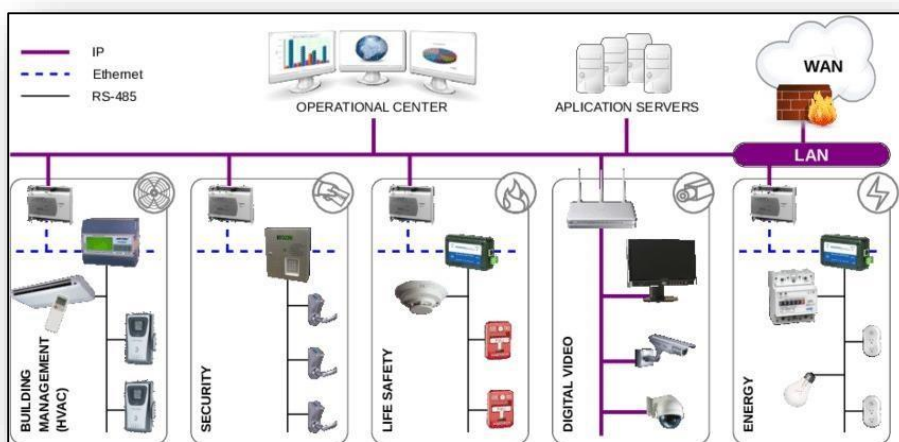

available in the house and allows the user to control them from the

touch panel only without the use of any mobile app. The device also features motion sensors, ambient light sensors, built-in Amazon Alexa service and a monitoring camera.

4-3-5 – Building Management Systems (BMS):

Smart MEP work with building owners and developers to optimize the ongoing value of your investment. We work with building managers and contractors to deliver robust, easy-to-use systems with built-in troubleshooting. We work with consulting engineers to design high performing future proof systems for state-of-the-art buildings.

4-3-6 – Electrical Trading (Switch, Sockets, Bus Bar Riser):

Our team brings together many specialists to solve your electrical needs. Their integrated technical knowledge and field experience provide you with a total electrical service during budgeting, design and construction throughout the life of your operation.
